

**OPERATING COSTS HAVE  
GONE UP AND PROFIT MARGINS  
HAVE GONE DOWN.  
WHAT CAN YOU DO TO GAIN A  
COMPETITIVE EDGE?**

- 💧 Reduce or eliminate chemical costs
- 💧 Reduce costly maintenance & downtime
- 💧 Improve your operating system's efficiency and prolong its life

**PREVENT HARD WATER SCALE BUILD-UP  
ON YOUR EQUIPMENT**

Electronic Water Conditioner

# ELIMINATE THE NEED FOR HARSH CHEMICALS & REDUCE MAINTENANCE COSTS

## UNIQUE FEATURES AND BENEFITS

- 💧 6-month performance guarantee
- 💧 5-year manufacturer's warranty
- 💧 Prevents buildup of hard scale deposits
- 💧 Helps breakdown existing scale on equipment
- 💧 Reduces the need for harsh chemicals to clean equipment
- 💧 HELPS CONTROL ALGAE & BACTERIA:
  - Scale inside pipes provides a breeding ground for bio-growth. As scale is prevented and removed by the LiquiPlus E.W.C., the bio-growth will be significantly reduced.
- 💧 HELPS PREVENT CORROSION:
  - The need for corrosive cleaning chemicals is reduced
  - Under-deposit and MIC (micro induced corrosion) is reduced

**LIQUIPLUS E.W.C. COM-2000**

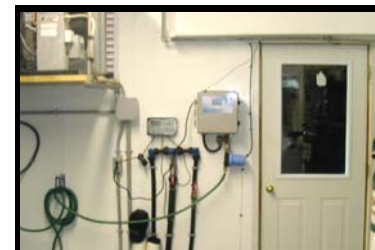

- 💧 Mineral rich drinking water
- 💧 Environmentally friendly
- 💧 Water proof enclosure & heat resistant cable
- 💧 Uses only 0.1 amps and operates on 110 volt AC
- 💧 Quick Payback period and High Return On Investment

## HOW IT WORKS

Liquiplus is a "Physics-based Water Conditioning Device" that prevents scale deposits from precipitating from hard water. It does not remove minerals from the water and it uses no salt unlike water softeners. The LiquiPlus E.W.C. uses a complex modulating high frequency waveform to physically alter the sharp, barbed, interlaced crystalline structure of calcium carbonate and magnesium carbonate molecules in hard water. The result is a change in the natural behaviour of these minerals preventing them from precipitating, binding to one another and adhering to anything they come into contact with.

## WORKS IN THE HARSHEST ENVIRONMENTS

Moyerdale Farms;  
Hanover, ON. -  
A Liquiplus E.W.C  
COM-2000 was  
installed to replace  
an existing water softener which was consuming  
one bag of salt every 2 to 3 days. After installation  
the softener was removed and no more salt was  
necessary to keep the milk house scalefree.
