

LIQUIPLUS DRAMATICALLY IMPROVES "SELLING APPEAL" FOR GARDEN CENTRE

August 7th, 2004

"...[We have had a]...large amount of calcium and iron in our water. ...our plants...would start to look unnatural. A crusty a layer would form on the leaves or needles...and the growth was...[stunted].

...Since we installed the LiquiPlus unit the difference is very obvious. The calcium problem has been eliminated and the iron has been reduced to some extent. The plants look much healthier. They are more lush, greener, softer looking and overall they have a much better selling appeal. ...

...[Our]...pipes at the connections used to have a great deal of hard mineral deposits on them. Since installing our LiquiPlus system this buildup has either been eliminated or is in the process of flaking away. As well, our water pressure has noticeably increased since the scaling inside the pipes has dissolved."

Sincerely,

Peter Kamerman

HARD WATER PROBLEMS?

Electronic Water Conditioner

**FOR
GREENHOUSES,
GARDEN CENTRES &
IRRIGATION SYSTEMS**

**Non-Chemical
Controls & Removes
Mineral Scale
Environmentally-Friendly**

Electronic Water Conditioner

DON'T LET HARD WATER EFFECT YOUR PLANTS' SELLING APPEAL

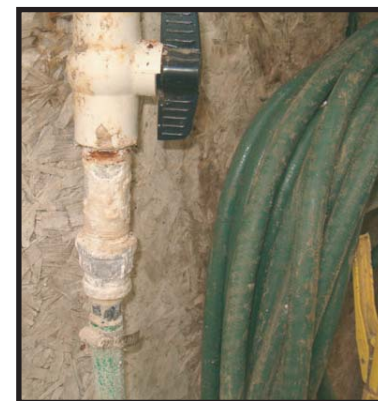

UNIQUE FEATURES AND BENEFITS

- 6-month, money-back performance guarantee
- 5-year manufacturer's warranty
- Lower salt levels in soil
- Reduce s leaf burn
- Prevents clogging and de-scales piping, connectors, clogged drip & spray irrigation emitters (improves wetting)
- Reduces iron build-up on plants
- Helps control bio-film and algae
- Less fertilizer required
- No need for dangerous & corrosive chemicals to keep the irrigation piping and emitters free of deposit build-up
- Reduce maintenance
- Save approximately 20% water use
- Increased water pressure from unclogged pipes
- Improves wetting efficiency - by creating "wetter water" through the reduction of surface tension the water is absorbed more efficiently by the soil
- Eliminates the need for "wetting agents" (surfactants)

LIQUIPLUS E.W.C. COM-2000

PREVENT SCALE BUILDUP ON YOUR EQUIPMENT

HOW IT WORKS

Liquiplus is a "Physics-based Water Conditioning Device" that prevents scale deposits from precipitating from hard water. It does not remove minerals from the water and it uses no salt unlike water softeners. The LiquiPlus E.W.C. uses a complex modulating high frequency waveform to physically alter the sharp, barbed, interlaced crystalline structure of calcium carbonate and magnesium carbonate molecules in hard water. The result is a change in the natural behaviour of these minerals preventing them from precipitating, binding to one another and adhering to anything they come into contact with.
