

THE FACTS **ABOUT WATER SOFTENERS:**

- 💧 Water softeners remove natural hard water minerals from water supply
- 💧 Softened water feels like you can't rinse soap from your skin
- 💧 Softened water makes your skin dry
- 💧 Water softeners add salt (sodium) to your water supply. This may cause health concerns.
- 💧 Water softeners require regular maintenance, an ongoing expense.
- 💧 If the home has a septic system the backwash or brine water, as it is called, can adversely affect the natural bacteria required to digest the waste. This brine can also cause the walls of the septic tank to corrode. Frequent septic tank "pump-outs", additional chemicals and a shorter life expectancy are the result.

ES-150 AC or DC power

HARD WATER PROBLEMS?

Electronic Water Conditioner

RESIDENTIAL SYSTEMS **FOR MOBILE HOMES**

- 💧 **Non-Chemical**
- 💧 **No Maintenance**
- 💧 **Controls & Removes Mineral Scale**
- 💧 **Environmentally-Friendly**
- 💧 **Quick Return On Investment**

ECONOMICAL - FULLY GUARANTEED

Electronic Water Conditioner

Wash Your Hard Water Problems Away!

UNIQUE FEATURES AND BENEFITS

- 6-month, money-back performance guarantee
- 5-year manufacturer's warranty
- Removes existing scale that is already in your system. This includes scale around your taps, toilets, shower heads, kettles and water heaters.
- Prevents any further scale build-up
- Reduces soap scum and produces better soap lather
- Reduces the amount of detergents needed
- Soap rinses squeaky clean

LIQUIPLUS E.W.C. HM-100X

- Reduces the harsh effects of hard water on skin and clothing.
- Provides environmentally friendly alternative to water softeners-no salt.
- Makes your water heater more efficient, the water heats more quickly
- Uses pennies a day in electricity

WHY IS LIQUIPLUS SO IMPORTANT FOR YOUR HOT WATER TANK ?

- Prevents scale from building-up on elements and inside tank
- Improves heat transfer efficiency
- Less energy consumption
- Extend its life expectancy

PREVENT SCALE DEPOSITS ON BOILER HEATING ELEMENTS

HOW IT WORKS

Liquiplus is a "Physics-based Water Conditioning Device" that prevents scale deposits from precipitating from hard water. It does not remove minerals from the water and it uses no salt unlike water softeners. The LiquiPlus E.W.C. uses a complex modulating high frequency waveform to physically alter the sharp, barbed, interlaced crystalline structure of calcium carbonate and magnesium carbonate molecules in hard water. The result is a change in the natural behaviour of these minerals preventing them from precipitating, binding to one another and adhering to anything they come into contact with.
