

THE FACTS

ABOUT WATER SOFTENERS:

- Water softeners remove healthy natural hard water minerals from the water.
- Softened water feels like the soap won't rinse from your skin.
- Softened water makes your skin dry.
- Water softeners add salt (sodium) to your water. Persons suffering from hypertension or congestive heart disease may require a sodium-restricted diet. This may cause health concerns.
- The Environmental Protection Agency cautions against drinking softened water. Softening using a domestic water softener increases the sodium level in drinking water and will contribute a significant percentage to the daily sodium intake for a consumer on a sodium-restricted diet.
- Water softeners require regular maintenance, an ongoing expense.

YOUR CHILDREN REQUIRE LESS SALT IN THEIR DIETS THAN ADULTS

**FULLY GUARANTEED
SIMPLE TO INSTALL
NO PLUMBING REQUIRED**

**EXPERIENCE SOFT WATER
WITHOUT SALT**

- Non-Chemical**
- No Maintenance**
- Controls & Removes Mineral Scale**
- Environmentally Friendly**
- Saves Energy Costs \$\$\$**

ELECTRONIC WATER CONDITIONER

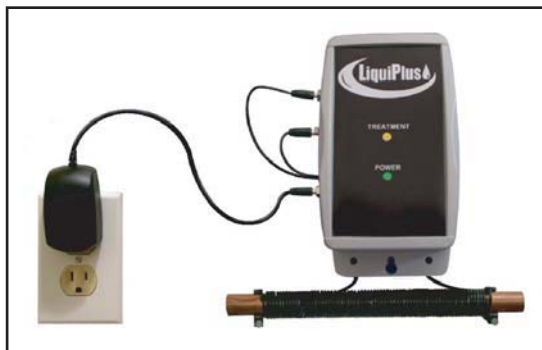

ELECTRONIC WATER CONDITIONER

Wash Your Hard Water Problems Away!

UNIQUE FEATURES AND BENEFITS

- Removes existing scale around your taps, toilets, shower heads, and inside kettles, pipes and water heaters
- Prevents any further scale build-up
- Reduces soap scum and produces better soap lather
- Reduces the amount of detergents needed
- Soap rinses squeaky clean
- 6 Month, money back guarantee
- 5 Year manufacturer's warranty

- Reduces the harsh effects of hard water on skin and clothing
- Uses no salt, and provides an environmentally friendly alternative to water softeners
- Makes your water heater more efficient, saves \$\$\$, water heats more quickly
- Lowers surface tension of water - better for indoor plants, outdoor gardens and uses less water for automatic sprinkler systems

WHY IS LIQUIPLUS SO IMPORTANT FOR YOUR HOT WATER TANK?

- Prevents scale from building-up on heating elements and inside the tank
- Uses only pennies a day of electricity
- Avoids costly replacements
- Protects hot water tank from failure

HOW IT WORKS

Liquiplus is a "Physics-based Water Conditioning Device" that prevents scale deposits from precipitating from hard water. It does not remove minerals from the water and it uses no salt, unlike water softeners. The LiquiPlus E.W.C. uses a complex modulating high frequency waveform to physically alter the sharp, barbed, interlaced crystalline structure of calcium carbonate and magnesium carbonate molecules in hard water. The result is a change in the natural behaviour of these minerals, preventing them from precipitating, binding to one another and adhering to anything they come into contact with.
