Hydro-Max HM-100 System

The Technology Concept

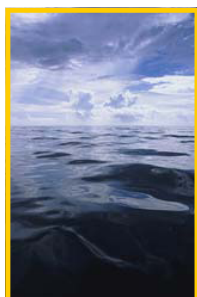

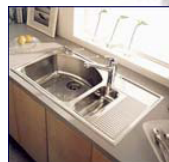

The Hydro-Max HM-100 Electronic Water Conditioner & Descaler is a small water treatment device that physically alters the behavior of "hard water" without adding anything to or removing anything from the water.

Calcium carbonate and other minerals naturally bond to plumbing surfaces and water appliances, eventually causing destructive lime scale build-up and expensive repairs. The conventional means for solving this problem is an Ion Exchange water softener. Softeners are expensive to purchase, require ongoing salt addition, add harmful sodium to the drinking water and their discharge is harmful to the environment. The Hydro-Max HM-100 provides a simple, affordable alternative solution to this complicated problem.

Electronic Water Conditioner & Descaler Protects your Home from Hard Water Damage

- **No Salt or Harsh Chemicals**
- Removes Existing Limescale from Plumbing
- Restores Lost Water Pressure
- Prevents New Limescale from Forming
- Restores Water Heater / Solar Heater Efficiency
- Reduces Surface Tension - Less Soap Needed
- Improved Sheeting Action - Less Spotting
- Reduces Dry Skin Condition
- Helps Maintain Free Flowing Drains
- Economical and Energy Efficient - Saves Money
- Environmentally Friendly - Septic Tank Safe
- No Plumbing Required - Installs in Minutes
- No Maintenance - Five Year Warranty

This will not happen
with Hydro-Max HM-100

The Cost of Hard Water

A thin layer of scale (1/8") can reduce heat exchange efficiency and increase water heating energy costs by as much as 25%. This translates to over \$200 a year in excess water heating cost. Premature failure and replacement of water related appliances can be avoided by installing an HM-100. The Hydro-Max HM-100 quickly pays for itself and provides years of trouble free service.

Facts about Water Softeners

Softeners remove natural minerals from water and add salt (sodium) to your water supply. That may cause health concerns. Softened water feels like you can't rinse soap off and makes your skin dry. Water softeners require regular maintenance and are harmful to septic systems, an ongoing expense.

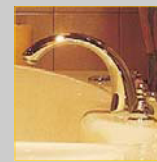

HM-100

Finally! An affordable alternative to a traditional water softener that is chemical and maintenance free.

Cindy Harrington, Port Orange, Florida

This innovative device allows me to condition my water without compromising my environmental principles.

Barbara Bowman, Ojai, California

***Special Swimming Pool Systems Available**

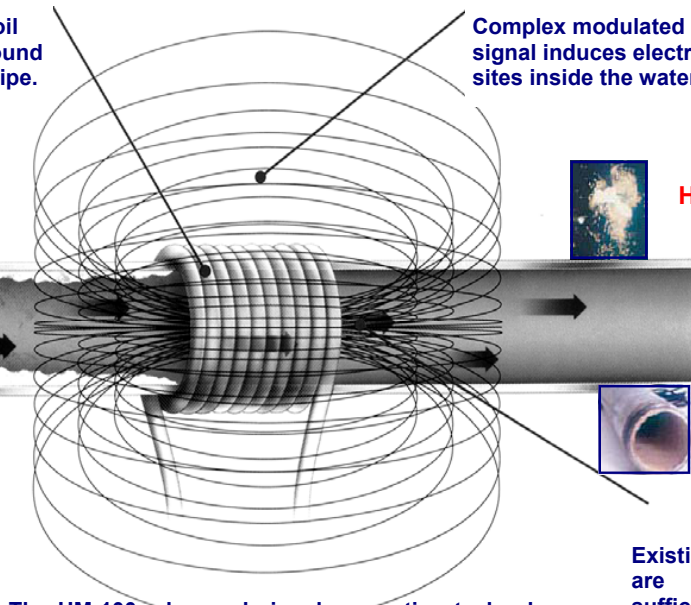

Induction Coil wrapped around cold water pipe.

Complex modulated electromagnetic signal induces electrically active sites inside the water pipe.

Before Hydro-Max

Incoming hard water containing calcium, magnesium and other minerals forms hard mineral scale build-up.

After Hydro-Max

Hydro-Max reduces surface tension which improves sheeting action and allows for soap and detergent reduction.

Hydro-Max causes coagulation of suspended solids which promotes settling, enhances filtration and improves water clarity.

Existing scale formations are gradually softened sufficiently to be flushed out of the system. Thus restoring optimum flow and heat exchange efficiency.

The HM-100 advanced signal generating technology produces an electrically generated surface active catalytic effect that initiates the formation of microscopic seed crystals of calcium carbonate. These seed crystals prevent the formation of hard mineral scale on plumbing and equipment surfaces.
